About NITTR Bhopal

“National Institute of Technical Teachers’ Training and Research (NITTR)”, Bhopal, established in 1965, has the mandate to cross the regional boundaries and function as a resource institution at National and International levels for entire gamut of Technical Education Sector. The institute has been catering to the wide-ranging needs through innovations in Technical Education System as well as to the job market needs of the developing countries also. The institute, with its enhanced mandate, has now become a major resource institution and a centre of excellence for the overall growth and expansion of technical education system of the country and has larger responsibility to contribute to a wide-ranging diverse labor market. It holds expertise through continuous R&D in the areas of HRD, curriculum development, design & development of learning resources, educational management, policy formulation, continuing education, student assessment, multi-media development, community networking, industrial liaison and technical education research.

It is an active partner in SWAYAM Project of MHRD, Government of India to facilitate self learning among practicing and potential teachers.

About The Conference

NITTR Bhopal is hosting a two days ‘International Conference on Advances in Technology, Management & Education’ on 14-15 January, 2021.

In the era of new economic structure, significant achievements have been made worldwide in the field of technology, management and education. Still considerable innovative researches is being continued to address the technical and economic challenges in our country. Designed to bring together a galaxy of academicians and practitioners on one platform, the main objective of this conference is to turn the spotlight on current and future advances in technology, management and education with respect to industry 4.0. The ICATME 2021 will include technical presentations, plenary talks, exhibitions, as well as attractive social events. The target audience for this conference will be professionals, industry experts, research scholars, academicians, planners, policy makers, practitioners, consultants, and students, with the following objectives:

- To understand issues and challenges in the research in the field of Technology, Management and education
- To disseminate knowledge and share experience in dealing with advances in technology, management and education.
- To provide an opportunity to sponsoring organizations and practitioners gain actionable insights through discussions with renowned panelists.
- It promises to be an intellectually stimulating experience to the attendees. So, come join us and share your ideas in this event.
- Encourage delegates to present and discuss their research findings and best practices
- Identify new ways and methods to promote collaboration and research.
